## **DETAILED ACTION**

Claim Rejections - 35 USC § 102

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

- 2. Claims 1-19 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Favrot et al US 6,624,267.
- 3. The rejection set forth under 35 USC 102/103 in the paper mailed 10/9/07 is deemed proper and is herein repeated.
- 4. Applicants remarks filed 2/5/08 have been fully considered but have been found not persuasive.
- 5. Applicants' primary point of contention is that the Favrot et al. patent does not disclose the use of PCA and the tan  $\delta$  reducing effect developed by using not more than 1.0 parts by mass of PCA. This is not persuasive. First and foremost, the claims do no require the incorporation of PCA. The claim limitation of "not more than" has a lower limit of zero. As such, no PCA need be present. Further, the showing of 1.0 paraffin in column 17 anticipates the claim. Paraffin is a known softening agent and used where PCA is typically used. One would understand that 1.0 PCA may be used in lieu of the paraffin.
- 6. Applicants then argue the trans-content of the diene based polymer, claims 3, 4 and 10. This is not persuasive. The high trans linkage percent is not seen to be exclusive of the claimed vinyl bond content. Particularly, the limitations of claim 4 which

Application/Control Number: 10/550,554 Page 3

Art Unit: 1796

are directed to the styrene comonomer. This limitation is met by the styrene generically called for at column 7 lines 63-68 and the examples.

- 7. The chelating agent of claim 19 is anticipated and/or obvious by the disclosure of the matrix bonding agent at column 7 lines 20+, the conventional additives at column 7 lines 30-35 and the barium ethyl diglycolate used in the examples. Given the breadth of the chelating agent language, all these ingredients function so as to "chelate" materials within the composition.
- 8. Applicants have failed to show or allege any unexpected results when the claimed invention is compared to the closest prior art.

## Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Peter D. Mulcahy/ whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on 571-272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
